WHEN THE GOING GETS TOUGH, DESTROY IT

HEAVY SCRUB

FORESTRY

AIRFIELD

WATERWAYS

The Destroyer rotary mulcher is designed to cut and pulverize heavy scrub and forestry regrowth up to 150mm. It is the perfect choice for maintenance of areas such as woodland rides and waterway banks.

This highly robust machine features three, 15mm hardened blades designed to work in the most intense conditions. Power transmission is given through a 150hp heavy-duty gearbox with a 4-plate slip clutch on the input PTO shaft. Assistance to clearing scrub material effectively is given through a rear bull bar, flattening material before meeting the blades along with adjustable, extra wide skids.

The Destroyer rotary mulcher is available in a working width of 2.1 metres and is ideal for forward and reverse drive.

SPECIFICATION		DESTROYER	
Machine weight	1080kg (2381lbs)	Gearbox	Cast iron housing
Hitch	Category 2 with clevis top link	Input shaft	1' 3/8" Z21
Hitch position	Front and rear mount	Gearbox lubricant	EP80-90W or GL-4 / GL-5 oil
Cutting width	1.90m (6' 2")	Gearbox oil capacity	3.5 litres (6.2 pints)
Overall width	2.20m (7' 3")	Cowl construction	All welded construction
Overall length	2.77m (9' 2")	Skid construction	Replaceable bolt-on skid
Cutting height	25mm - 225mm (1" - 9")	Blades	15mm Carbon Boron hardened and tempered. Free swinging.
Cutting capacity	150mm (5.9")	Blade quantity	3
Recommended tractor HP	100hp (75kW)	Blade tip speed	66 m/s (12992 fpm)
Power take-off speed	1000rpm
