LOOKING FORWARD TO 2025

Welcome to Issue 17 of the Agricultural Register. As we head into Spring, we are looking forward to the chance to connect with our customers, suppliers, and the wider community. The year is already off to an exciting start.

We kicked off the year by attending the **LAMMA Show**, where we had the privilege of supporting our valued suppliers. The show was a great success, allowing us to strengthen relationships with suppliers and customers alike and learn about the latest innovations in the industry.

Last month, we had the honour of hosting this year's **Kubota Expert Testing & Servicing Clinic** at our Sutterton depot, as part of the Kubota Insight Programme, which involved:

- ▶ Seeing the Kubota service experts at work
- ▶ Meeting the Kubota product experts and engineers
- ▶ Learning about the latest Kubota products and service offerings

A big thank you to everyone who attended and to Naoki and Mariko from Kubota, who travelled all the way from Japan to lead the discussion.

In May we'll be heading to the **Lincolnshire YFC Rally** and the **Woodhall Spa Show**. These events are always a highlight, and we're always happy to support local communities and to share more about ours, and our suppliers' products and services.

June will be another busy month, with the **Lincolnshire Show** on the horizon, and we're looking forward to seeing you there. Alongside this, we will again be hosting **Open Days** at our depots. These open days will feature a showcase of our services to you, our customers and also our suppliers and their products. More details will follow!

As always, we are committed to supporting our customers and we hope to see you at these upcoming events. Keep an eye on our social media channels for more updates and announcements.

TRACTORS & COMPACT TRACTORS

£72,500+VAT

2021 JOHN DEERE 6155R AUTOPOWER Ref. AG31071 Hours: 5439
C/W - 50kph AutoPower, TLS front suspension, Cab Suspension, Autotrac ready (premium activation), command arm, front linkage with PTO, 4 electric spools, 3 speed PTO, telescopic pick up hitch with dedicated valve, Isobus, air trailer brakes, power beyond prepared, 520/85R38 rears, 420/85R28, air seat, air con, passenger seat & radio.

£73,450+VAT

2021 JOHN DEERE 6155R TRACTOR Ref. AG31124 Hours: 3162
C/W - 50kph Autoquad plus with creep box, TLS front suspension, cab suspension, Autotrac ready (no activation), 4 electric spools, 3 speed PTO, telescopic pick up hitch with dedicated valve, Isobus, air trailer brakes, power beyond prepared, 520/85R42 rears, 420/85R30 fronts, air seat, air con, passenger seat & radio.

2015 KUBOTA R085 WHEELED LOADER Ref. 31011219

C/W - Pallet steer, hydrostatic drive, automatic diff lock, 62.5HP 4 cylinder kubota diesel engine, pivot steer. 4000 hours

£13,000+VAT

2018 KUBOTA L1361 COMPACT TRACTOR & LOADER Ref. GC31024

C/W - 36HP, ROPS, manual transmission & ag tyres. 1361 hours.

KUBOTA BX261 COMPACT TRACTOR Ref. GC28108

C/W - HST, ROPS, 26HP, high-low gear shift, 4WD & turf tyres.

£9,495+VAT

KUBOTA EK1-261 COMPACT TRACTOR Ref. GC29055

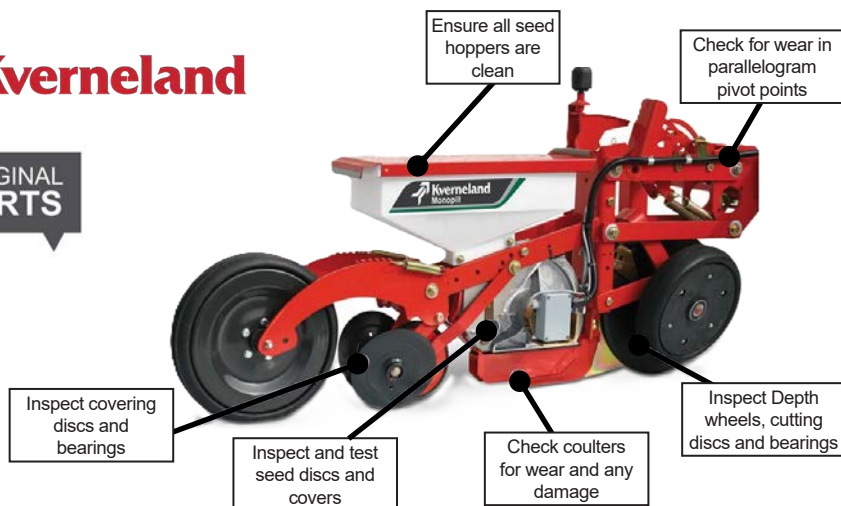

C/W - 25HP, ROPS, turf tyres & manual gearbox.

GET READY FOR THIS SEASON

Contact your local Ireland's depot to arrange a pre-season service or health check on your Monopill, and take advantage of special Out of Season prices on Original parts.

ORIGINAL
PARTS

Tungsten Carbide Protected Coulter

New Tungsten Carbide protected Mulch Seeding coulters add extra efficiency. The specially placed Tungsten Carbide Studs equally placed along the cutting edge gives 4 points of defence against stones and wear – guaranteeing smooth performance and longer life time when compared to conventional coulters. The protected "Cutting Edge" delivers a constant depth and "V" furrow profile ensuring the seed remains where it is placed – resulting in consistent spacing, germination and plant growth.

Seed Discs

The seed discs are the heart of the machine. Dependant on the seed being sown, each disc contains a number of "Seed Cells" that are designed to ensure consistent seed spacing and depth. Worn discs can result in irregular spacing, poor germination and reduced crop yields.

Parallelogram

The Monopill's parallelogram linkage ensures a uniform depth and performance from all seed units in all conditions. Ask us to check all pivot points and replace those worn with the Overhaul Kit.

Disc & Bearings

Sharp and serviceable cutting discs ensure the ground is cleanly cut enabling the seed coulters to penetrate the soil to produce a clean V shaped furrow. Likewise the rear soil covering discs guarantees the seedbed is evenly covered ensuring optimum seed protection and even germination. Hard ground conditions and deep sowing can apply added stress to the cutting disc bearings and which could result in increased wear. To protect this important area the overhaul bearing kit is now available.

STEWART

LEGEND

Introducing the new LEGEND range

The revolution in trailer design continues with the new 'Legend Range' of trailers from Stewart, who as responsible suppliers take pride in the quality of their trailers with safety being a critical part of any design.

The LEGEND Range incorporates a new and improved lighting system and several innovative safety features.

The LEGEND Range is built with a mild steel body. The trailers are built with a box section chassis

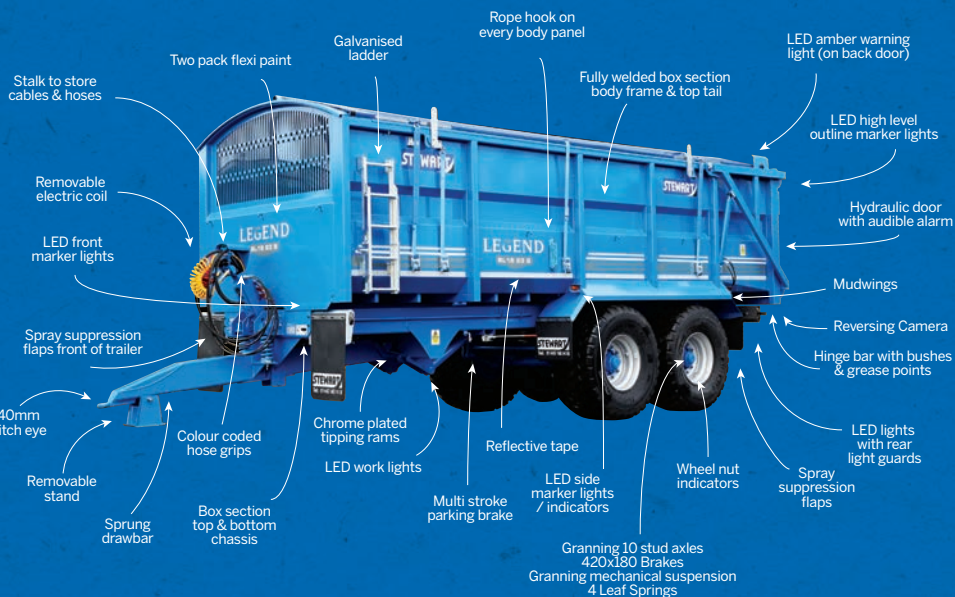

and the body has a box section body frame and top rail for strength and durability.

The key features are listed below. Ask for further details and a quote

Kubota machinery boast exceptional performance, reliability, and efficiency, making them a top choice for both residential and commercial users.

On steep slopes and over rough surfaces, the RTV Utility Vehicles offer 4-wheel drive that adapts to all situations. There are several models, including two petrol versions (400 and 500 cc) and one diesel (900 cc) to meet all your needs.

RTV-520

Power: 18HP Weight: 625kg / Body colour: Kubota Orange

RTV-X1110 / RTV-X1140

Power: 24HP

Weight: 1000-1090kg

Body colours: Kubota Orange/ Realtree AP Camo

Kubota mowers are engineered to handle a variety of terrains and conditions, ensuring a consistently high-quality cut, and each model is designed for comfort and ease of use. With models ranging from 13-50 HP with cutting widths up to 72", including zero turn and now electric models, there's something to suit your needs, whether you're maintaining a large lawn or tackling extensive landscapes.

GR Series

Power: 13-21HP

Weight: 355-545kg

Cutting width: 42-48"

Collector capacity: 340/450l

ZD1211

Power: 25HP

Weight: 790kg

Cutting width: 60"

FC Series

Power: 22-50HP

Weight: 1000-2000kg

Cutting width: 44-61"

Collector capacity:

600/800/1300l

Drilling flexibility from the tine seeder

Looking for a more versatile drilling solution to cope with changing weather patterns, Spilsby, Lincs-based RH-J (Farms) opted for a 6m ts-drill, from Irelands Farm Machinery.

"We had a couple of seasons where we had little option but to reach for our 4m power harrow drill combination to get crops in, instead of our 6m drill of choice," explains farm manager Mark Blows, pictured right with farm owner Alistair Hall-Jones.

"Failing to drill our crops is not an option, so we decided to find a flexible and versatile solution that could operate in less than ideal conditions."

RH-J (Farms) grows winter and spring wheat, winter and spring barley, oilseed rape, sugar beet, spring beans and forage maize across 1,600 acres. An on-farm AD plant consumes forage maize in exchange for digestate.

"We plough for sugar beet and forage maize, but use a flat lift and either a carrier or NZ-type cultivator for everything else," he says. "Then the ts drill can go straight in. It's a very simple and straightforward process that has reduced establishment costs while gaining output."

Mark says that the Kverneland tine something of a saviour for the Lincs but adds that you have to look beyond leaves behind.

"....The ts-drill is proving an ideal solution for our business"

Mark Blows, RH-J (Farms)

"It only has a few tines, though the drainage," he says where condition

Bunning
AGRICULTURAL EQUIPMENT

Great Plains

TONG SWIFTLIFT

GRANGE
MACHINERY

"Where we've been unable to get some winter sown crops in, the ts has been the perfect solution for spring-sown crops," he says. "There's plenty of stagger in the frame to deal with trash, and it seems to cope with anything we've thrown at it. We've also started drilling our own spring beans with it, where previously, we had to rely on a contractor."

Handled by an MT765C rubber-tracked tractor, Mark says that output is averaging out at a modest 100 acres/day, with the Challenger favoured for its low ground pressure, not its power output.

"The Challenger and ts make a great combination that can travel well in most conditions," he adds. "The drill is close coupled, so front end ballast isn't an issue, and running on part throttle, the tractor doesn't use a lot of diesel and traction is guaranteed."

Mark adds that the isobus-equipped drill has simplified the process of seed roller changes and calibration, while emptying the hopper is equally as easy to achieve.

Recognising the way conditions are changing year-on-year, and with soil types ranging from clay on the wolds to peat on the fens, RH-J (Farms) says that having options available for cultivations and drilling is essential.

"We're almost going back to where we used to be," adds Mark. "Direct drilling won't work for us - we need land turned over, or at least sub-soiled, ready for drilling. And the ts-drill is proving an ideal solution for our business."

seeder (ts-drill) has been
family farming business,
and the finish that the drill

lowing harrow behind the
e open finish can help
ays. "We'll roll behind,
s allow."

SERVICE & WORKSHOP

We can help you keep on top of your maintenance programme this spring

Rolling Road Trailer Brake Testing & Health Checks

We can offer this service at any of our depots or on-farm with our machine, equipped with extra wide rollers to accommodate all makes and models of trailers. Health checks also include checking wheel bearings, spring or tandem units, brakes, pipework, rams, electric and tyres.

Tractor Servicing

We have expertise and experience servicing all makes of tractors covering air-conditioning, hydraulic rams, gearbox overhaul and engine rebuilds. Tractor services can be performed on and off site. Our experienced team of engineers are available to maintain your machinery to the highest possible standard. We keep a huge amount of parts in stock to ensure maintenance is performed as quickly as possible.

Drill Testing

We are a British Sugar approved test centre. Ensure your drill units are booked in for their annual tests. For electric drive drills, we offer a full on-farm testing service.

Mobile Rotor Balancing & Vibration Analysis

Ensure your rotors, flail mowers, mulchers, fans, shafts and pumps are operating smoothly while running. Wear and tear can unbalance a machine resulting in short machine and bearing life. No need to remove rotors or shaft reducing labour and down time!

Hydraulic Hose & Pipe Crimping Service

We offer a pipe crimping and hydraulic hose making service at our Carrington and Sutterton depots, making and repairing most sizes of hydraulic pipes and rams used on the farm today. Our machine ranges from 1/4" to 1" bore.

Air Conditioning Service

Our BAGMA certified air conditioning technicians are able to test, repair and service your air conditioning systems on a wide range of farm vehicles and machinery, including farm trucks, small vans, tractors, combine harvesters and lorries.

PTO Replacement Parts & Shafts

Replacement parts and shafts for many types of PTO and gearboxes.
