STRONGER
TOUGHER**

HARDOX®
IN MY BODY

WHAT IS HARDOX®?

Hardox® is a wear plate; structures made of Hardox® weigh less and last longer than those made from mild steel. A tipper body made from Hardox® is more durable due to the unique combination of hardness and toughness. Using Hardox® allows for a body design with a minimum number of reinforcing beams on the outside.

FLAT TRAILERS

FLAT TRAILERS CAN BE SUPPLIED WITH 4MM STEEL OR 28MM KERUING FLOORS FOR THE SAME PRICE. The standard Flat Trailer is used with our Livestock Floats, for carrying a float we recommend a Keruing floor and 435/50R19.5 tyres. Please get in touch for more information.

BALE TRAILERS

BALE TRAILERS FROM 26FT TO 36FT CAN BE BUILT BASED ON OUR STANDARD FLAT TRAILER RANGE. We have two models available, there is a trailer for two rows of bales and the other version carries three rows high. The trailers can be used for round or square bales, the important point is that the retaining arm must be at least half way up the bale to keep it securely on the trailer.

LIVESTOCK TRAILERS

LIVESTOCK CONTAINERS ARE FABRICATED ALMOST ENTIRELY IN ALUMINIUM GIVING A STRONG BUT LIGHTWEIGHT, DURABLE CONSTRUCTION. The livestock container is fully welded, the pressed side sheets are welded to box section posts at 1150mm intervals, and the floor is welded all round. The fully welded design prevents effluent from leaking through onto the trailer.

LOW LOADERS

LOW LOADER TRAILERS ARE FITTED WITH A 45MM KERUING FLOOR. HYDRAULICALLY OPERATED RAMPS ARE STANDARD ON 15 TONNE AND 22 TONNE MODELS. Every trailer is custom built, there are a wide variety of optional extra items available to choose from. We can supply open tread ramps, timber clad ramps or steel ramps, the steel ramps can be galvanised or paint finished.

DUMPER TRAILERS

WE PRODUCE THREE TYPES OF CONSTRUCTION TRAILERS WHICH ARE AS FOLLOWS:
Construction Dumper trailers with a scow tail, Construction Monocoque trailers which have a flat floor and the Construction PRO trailers with a Hardox® body. Please get in touch for more information.

PRO SERIES

OUR PRO SERIES TIPPING TRAILERS ARE BUILT WITH HARDOX® BODIES. A tipper body made from Hardox is more durable due to the unique combination of hardness and toughness. Using Hardox allows for a body design with a minimum number of reinforcing beams on the outside therefore saving weight without losing strength.

LEGEND RANGE

THE LEGEND RANGE are our standard tipping trailers built with a mild steel body. The trailers are built with a box section chassis and the body has a box section body frame and top rail for strength and durability.

ROAD KING

THE ROAD KING IS BUILT ON THREE AXLES WITH AIR SUSPENSION, AND AN OPTIONAL REAR STEER AXLE FOR ADDED MANOEUVRABILITY. THREE AXLES ON THE TRAILER KEEP THE MAX AXLE WEIGHT TO 8 TONNES. It is fitted with an air braking system with load sensing and ABS and no hydraulic braking. The standard model also features a roll cover, front view grille and radial flotation tyres.

STEWART TRAILERS AVAILABLE FOR HIRE

2022 STEWART GX18 23 S

C/W - Sprung drawbar, commercial axles with 560/60 R22.5 wheels, air and oil brakes with ABS, hydraulic rear door with grain chute, rollover easy sheet, silage kit and Transcover front to back hydraulic cover. Also available in GX 16 21 L Version.

IRELANDS GROUP TO CONTINUE PARTNERSHIP WITH KUBOTA

Irelands Group is pleased to confirm that, following recent discussions with Kubota, we will continue to represent Kubota in Lincolnshire.

In the Autumn of 2025, we announced our intention to resign from the Kubota franchise. Since then, we have engaged in constructive dialogue with our customers, which has led to us withdrawing our termination.

Both Irelands Group and Kubota have now reached an agreement that will see us continue as an authorised Kubota dealer for agricultural and groundcare machinery.

This renewed commitment ensures continuity of sales, service, and parts support for Kubota customers throughout Lincolnshire. Customers old and new can be confident they will continue to receive the same high standards of product knowledge, aftersales care, and technical expertise they have come to expect from the Irelands Group team.

We've had a lot of support and feedback from our customers, who wanted us to continue as a Kubota dealer based on the service and support, we've given them over the last twelve years, and I'm pleased to announce that Kubota will remain a key brand within our agricultural and groundcare portfolio.

For more information, please contact our Carrington Depot

CARRINGTON (HEAD OFFICE) - 01205 480460

MAIN ROAD, CARRINGTON, BOSTON, PE22 7HX

IRELANDS APPOINTED CLAYDON DEALER FOR LINCOLNSHIRE

We are proud to announce that we have been appointed to sell and support the full range of Claydon Opti-Till® crop establishment machinery across mid and south Lincolnshire.

Claydon has built a strong reputation for delivering efficient, integrated crop establishment systems designed to reduce cost per hectare without compromising output. The Opti-Till® System is engineered to improve soil health, structure and timeliness while significantly lowering fuel use, labour requirements and wearing metal costs.

This appointment marks the first time Irelands has offered a true direct drill system, complementing our existing implement portfolio and strengthening our commitment to progressive arable farming systems.

Demonstration Machines Available.

To support customers locally, we have invested in:

- 3m Claydon Evolution grain-only direct drill
- 7.5m Claydon Straw Harrow

Both machines are available for on-farm demonstrations across our trading area, covering soil types from light sand through to heavy clay and Grade 1 silt.

The Claydon Evolution drill's unique leading tine technology creates optimum tilth and drainage in the rooting zone while leaving soil between bands undisturbed, helping conserve moisture and support trafficability. Designed to work direct into stubbles, as well as in min-till or plough-based systems, it offers flexibility across a wide range of crops and conditions.

Claydon Direct Drills and Stubble Rakes are eligible for grant funding.

FETF44: DIRECT DRILL

- EVOLUTION MOUNTED DRILLS RANGE
- HYBRID TRAILED DRILLS RANGE

Eligible for 50% paid towards item.

Max value £15,067

FETF208:

TRACTOR MOUNTED STUBBLE RAKE

- STRAW HARROW RANGE FROM 7.5M

Eligible for 40% paid towards item.

Max value £6,720

Applications for the next round open on 17 March and close at midday on 28 April 2026.

CLAYDON

IRELANDS HAVE EXPANDED OUR GROUNDCARE OFFERING

BY BECOMING KRESS ROBOTIC MOWER DEALERS.

IMF Group is delighted to announce that we are now an official stockist of Kress tools and robotic mowers. Renowned for precision engineering, durability, and innovative battery technology, Kress products represent the very best in professional-grade performance for both trade and domestic customers. By bringing Kress tools and robots into our range, we're reinforcing our commitment to supplying high-quality, forward-thinking equipment that delivers reliability, efficiency, and outstanding results. We're proud to partner with such a respected brand and look forward to offering our customers expert advice and hands-on support across the full Kress lineup.

Nicki Jones, Head of Marketing at Kress, said: "We're delighted to welcome IFM Group as an authorised Kress dealer. Their expertise and customer-first approach align perfectly with our brand values, and we're excited to support their growth with the Kress range."

Please contact Paul for more details.
